

MANAGED WI-FI SERVICES FOR BUSINESSES

goWiFi has been a great addition to our restaurants. This system allows us to designate just enough of our internet capacity for customers without slowing our POS system and credit card processing down. Also, it's peace of mind knowing that we will not have a data breach from allowing customers to use public Wi-Fi because goWiFi protects us. This, along with the terms and conditions page goWiFi created for us, is the reason goWiFi is our recommended public Wi-Fi provider.

OVERVIEW

ViaSat® goWiFi offers a fully-managed, public Wi-Fi hotspot for businesses, including:

- » Restaurants / Cafés
- » Bars / Nightclubs
- » Marinas
- » Parks
- » Retail Stores
- » Health Clubs

goWiFi offers the best public Wi-Fi service based on our experience, strong industry partnerships and superior reputation. With thousands of locations already deployed across North America, the service is providing more places for customers to get online when away from their home or office.

The plug-n-play Wi-Fi service drives more customers to your locations and extends your brand, products and services to them over the Wi-Fi pages while at your location. In addition, we can securely support a private side employee network.

SIMPLE SIMON'S PIZZA

ViaSat customer service center is available 24x7 to support our business partners and their customers. That means we take the calls should a customer have trouble connecting, so you can go about your business.

With the rapid growth of mobile devices driving increased demand for Wi-Fi connectivity, your business needs a partner that has the experience connecting these devices in an easy, secure and seamless manner.

Remarkably simple Wi-Fi – goWiFi.

Attracting and retaining some of the largest companies in the world, we offer unparalleled service, experience, breadth of our software tools, and a customer focus.

GOWiFi ADVANTAGES

Usage Reporting

- » Number of users, duration of use, and more.

CALEA Compliance

- » Network security and compliance with government agency requirements.

Network Isolation

- » End users are isolated on their own network segment, no routing between users. Secure private wireless network for business use.

The Challenge:

A business needs a managed Wi-Fi service.

- » goWiFi is a managed, plug-n-play solution designed for businesses to provide Wi-Fi to their end-users. Customize the service to fit the needs of your business so that your brand stays consistent throughout your customer's entire online experience.

Our Solution:

goWiFi

- » We provide an easy-to-use, reliable, and secure way to increase customer satisfaction in your business, thus increasing customer loyalty and revenue.

Managed Wi-Fi
from ViaSat

Content Filtering

- » Prevent inappropriate content from being accessed in the business location.

24/7 Tech Support

- » U.S. based technical support.

Terms of Service

- » Users accept terms and conditions on the portal page and take full responsibility for their actions while using the internet.

Available Nationwide

- » Whether a business is using Exede or any other ISP, adding goWiFi to the sale extends the reach of the connection with plug-n-play hotspots for both single and multi-site networks.

Proven Track Record

- » The goWiFi team is currently managing and monitoring over 100,000 in-building and outdoor public hotspots and hotzones as well as user access from over 5 million access points worldwide. Distribution partners include Sprint, Comcast/Xfinity, Time Warner Cable and many others.

Customized User Experience

- » We develop unique, branded login pages, device authentication, roaming, banners and notifications, which ensure a quality experience for end users and greater visibility for the business owner's brand.
